MODERN TRENDS OF FISCAL OFFICERS' PROFESSIONAL TRAINING

In terms of fundamental transformations, which now the Ukrainian society faced today, the most important role in training specialist tax-officer takes psychological science that deals with the study of patterns and mechanisms of functioning and development of the individual in society.

By this time there was no professional research in the field of tax police are not allocated profession inherent in the service and

there was a clear list of important professional skills required for successful professional activity in this area.

The lack of full-time psychologists, even as part of the regional offices of the tax police, affects. In most cases, workers are forced to pick up personnel vehicles candidate at intuition demands of the profession to the individual employee [1].

Psychology occupies a special place in preparation of future tax service professionals whose professional activity is in the field of «human-human» and is strained due to perform complex responsible of the shortage of time. Professional occupies of tax officer in this case depends on the degree of development of higher mental processes of the individual: attention, memory, logical thinking, creative imagination and more.

Tax officer should have the following qualities that ensure successful implementation of professional activity:

- the high level of concentration, stability and selectivity account;
- a well-developed and long-term memory;
- high level of mental operations: analysis, synthesis, comparison, the ability to analyze and correlate facts;
- ability to self-willed;
- high level of mental and emotional stability;
- welldeveloped communication skills.

For law enforcement system is an important self-awareness of their role in society and the use of a particular person leading figure in the respective official activities in order to avoid professional incompetence in the relevant professional activities.

Professional training of students, future law enforcement needs true social-psychological approach to identity formation, which should exclude powerful solution to situations indifference, intolerance in personal relationships.

The high level of self-government and their behavior in dealing with professional tasks - the best method to be effective professional and personal mental health worker of Tax Service.

It is very important to him is to master their own emotional displays and control over them, especially in stressful emergency situations and bring a professionally important volitional qualities.

Tax officer in their daily professional activities interact with citizens, as professional communication serves as a psychological factor, a means to an office tasks. Contact with the subjects of taxation, the employee must thoroughly know the psychological characteristics of professional communication, to be able to use the entire arsenal of psychological impact for the success of the activity [3].

Much of the detective-time operating unit tax police linked to work indoors, along with this work may be carried out in the open. In addition, the detective periodically replaced on duty (including per diem) and went to the scene reportedly coming from regular units [2].

In analyzing the professional operational activities should be noted a number of negative factors that significantly restrict social, socio-economic and spiritual needs of the individual. The degree of prevalence and significance of can be arranged as follows:

- lack of free time;
- relatively low level of pay (salary);
- the inability to have additional types of income;
- the feeling of hostility from others;
- inability to resolve their own issues bypassing of the law; -fear for their lives;
- the inability to have a trusting, friendly relationship.

Employees in the units of the tax police specialists completed legal or economic education, which can be obtained at the National University of STS of Ukraine or in other public and private higher education institutions.

Implementation of these tasks requires a skilled, competitive, competent, responsible professional freely has his profession, versed in related industries, capable of effective professional work at international standards ready for continuous professional development, social and professional mobility.
