THE CONCEPT OF THE LEGAL MONITORING IN UKRAINE

Revealed a system of views on the legal monitoring in Ukraine, the method of its understanding and interpretation. Formulated the concept of the legal monitoring in Ukraine. Formed the principles, objectives, scope, objects and subjects of legal monitoring in Ukraine.

Legal monitoring is a form of legal technologies. Consideration of this phenomenon from this point of view allows to bring together empirical and logical in research of this kind, cover and connect the dots not only methods of study of legislation and law enforcement, but also organizational, administrative units, institutional, functional and instrumental components of its nature and content.

Identification of the legal monitoring is a consequence of sustained study of the phenomenon, which had not previously undergone special research in the aspect of legal techniques and technologies, the identification of new parties to the monitoring, which, although recorded in the earlier studies, but was considered as elements of the methodology of the legal monitoring.

The concept of the legal monitoring in Ukraine is interpreted by us as a particular way of understanding (interpretation and perception) technology equipment of the legal monitoring as a segment of legal technique and component of the legal system of rational methods of observation, analysis and evaluation of the quality of legal acts and practice of their application.

The principles of the concept of legal monitoring equipment in Ukraine, define the strategy of scientific research, namely: the law; the obligation; computer security; completeness of the information base; the objectivity and reliability of information; transparency; equipment.

The main task of the knowledge of the techniques of the legal monitoring is not only to develop the most advanced methods and means of its implementation, but also in revealing the rational ways of

implementation of theoretical knowledge of law, legal monitoring and legal techniques in practical sphere.

Keywords: legal monitoring, legal control, legal technique, concept, normative-legal act.
